1.The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Dorn et al for reasons of record as set forth in paragraph 1 of the previous action.

2.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 15, 17-20 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorn et al for reasons of record as set forth in paragraph 2 of the previous action.

3.Claims 4-14 and 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorn et al in view of the article to Oh et al in Appl. Phys. Lett. 2000, 76(24):3525-3527 for reasons of record as set forth in paragraph 3 of the previous action.

4.Applicant's arguments filed October 19, 2005 have been fully considered but they are not persuasive. Applicant submits that the optical switch of Dorn et al is not a waveguide, but rather is a Bragg mirror. However, Webster's II New Riverside University Dictionary defines waveguide as: "A system of material boundaries...capable of guiding high-frequency electromagnetic waves" and clearly the optical switch of Dorn

Art Unit: 1732

et al does this. It is not clear why applicant believes that a reflection of light would not constitute guiding the light. Looking at col. 3, line 66 through col. 4, line 20, it is rather clear that the switch of Fig. 3 is functioning in a manner to guide light.

**5.THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
